Pharmacy Research Panel
Pharmacy Research Panel

• Seven panelists including recent EMSOP graduates (Drs. Phil Koo and Thea Golden) and current students (Neil Foglio, Alex Wei, Kristin Poppiti, Diana You, and Qi Wang) described their research experiences at EMSOP.

• More than 85% of attendees were from the PP2 and P1 classes and only 14% of attendees were currently participating in an EMSOP research program.
  – The majority of attendees were interested in Industry Internships, the Summer Fellowship, and Honors Research.

• Attendees gave high ratings to the quality of the panelists, moderator and question-and-answer session.

• A survey of attendees revealed the perceived benefits and challenges of undergraduate research.
## Research Perceptions

### Perceived Benefits
- One-on-one relationship with faculty member
- More competitive for jobs after graduation
- Develop technical skills
- Learn more about a specific area of pharmacy

### Perceived Challenges
- Additional time commitment beyond course work
- Will miss out on other EMSOP opportunities
- Difficulty finding a mentor
- Difficulty finding information about opportunities
