

PGY-2 Emergency Medicine Residency Robert Wood Johnson University Hospital/Rutgers University

The PGY2 residency in emergency medicine pharmacy will focus on the provision of clinical pharmacy services to RWJUH Emergency Department in New Brunswick, NJ. RWJUH is the level 1 trauma center for Central New Jersey seeing approximately 90,000 patients annually. The resident's focus will be on the direct care of ED patients in treatment areas such as emergent care, urgent care, non-urgent care, pediatrics, and psychiatry.

Additional focus in toxicology is possible through elective rotation with the RWJUH Toxicologist as well as monthly toxicologist consultants' conference at the New York City Poison Control Center. An academic appointment with the school of pharmacy is provided and the resident is provided the opportunity to participate in teaching certificate program at RU, toxicology related didactic lectures, and function as a co-preceptor for Rutgers University pharmacy students.

The PGY2 residency in emergency medicine pharmacy is designed to transition PGY1 residency graduates from generalist practice to specialized practice which meets the needs of patients in the emergency department setting. Upon completion of training, graduates are equipped to be fully integrated members of the interdisciplinary emergency medicine team, are able to prioritize responsibilities and utilization of resources, and are able to make complex medication recommendations in this fast-paced environment. Training focuses on developing residents' capability to deal with a wide range of diseases and disorders that occurs in patients in the emergency environment.

Graduates of the program are empowered to treat and appropriately triage the most complex chronic and acute illnesses presented by emergency department patients, including those with multiple disease states and serious complications. They also acquire the experience necessary to exercise leadership for emergency medicine pharmacy practice in the health-care system. Graduates of the emergency medicine pharmacy residency are experienced in teaching other health professionals and those in training to be health professionals.
