POSITION TITLE: Staff Pharmacist (need 3)

LOCATION: Southeastern PA Hospital

RESPONSIBILITIES: *The Staff Pharmacist will provide accurate drug screening, information, processing and dispensing services for safe distribution and drug administration.
*Counsel patients on medication usage by addressing drug related questions; and consultations regarding lifestyle modifications and preventative care.
Combined Staff and Clinical responsibility
*Oversees the activities of the pharmacy technicians, coordinating workflow and checking all medications prepared for patients.
*Assisting with training and supervision to ensure pharmacy team achieves unsurpassed patient satisfaction.
*Training team members, maximize overall team performance, and overseeing your support team.
*Responds to customer concerns using problem solving skills, tact and discretion. Preserves patient confidentiality.

PREFERRED SKILLSET OR ABILITIES: *Excellent interpersonal communication skills
*Team-based approach to training provides tremendous opportunity for the experienced retailer to transition into hospital practice with little or no previous hospital experience

REQUIRED LICENSURE: *B.S. in Pharmacy or Doctorate of Pharmacy from an accredited school
*Pennsylvania licensed (eligible) pharmacist in good standing

SALARY AND BENEFITS: *Benefits include comprehensive health care coverage, pension plan, paid vacation and educational assistance.
*They honor the importance of a work-life balance and offer a competitive salary.

OTHER COMMENTS: *Our client is a large teaching hospital focused on patient safety and commitment to clinical excellence.
*Their cutting edge technology includes a web-based safety and information program that provides practice standards, dosing and infusion calculators, data collection tools for clinical programs, automated dispensing technology, computerized medication administration records and bar-code technology.
*To support their impressive growth, they look to add 3 Staff Pharmacists to their expanding Pharmacy.
