

Is your friend:

or someone you know

spending a lot of time alone

becoming messy—not bathing, changing clothes, or brushing their teeth

losing interest in their favorite things

missing important appointments or sleeping at strange hours

nervous, cranky, or moody

really tired and sad

 **They may have a drug problem.** 

According to a recent study, **opioids** account for the greatest proportion of the prescription drug abuse problem," and when these pain relieving medication become less available, they turn to **heroin.**

People with an addiction usually can't stop taking the drug on their own.

See the signs, don't ignore them.
