Rotations available

General pediatrics
Pediatric intensive care
Neonatal intensive care
Hematology/oncology
Infectious diseases
Neurology
Emergency medicine
Pulmonary (inpatient)
Pulmonary (clinic)

One of the two months at Jersey Shore University Medical Center will be spent in the Pediatric Pulmonary Clinic.

One month will be spent at Robert Wood Johnson University Hospital learning basic elements of pediatric pharmacology research.

The resident will spend at least 2 months consecutively at each of the four principal sites, focusing on different areas at each site.

An extra month will be spent at Morristown Medical Center to increase exposure to the Pediatric and Neonatal Satellites for the purpose of learning the operations of a successful pediatric pharmacy staffing model.

Responsibilities

- Active participation in daily patient care rounds, provision of drug information, and medication therapy monitoring for pediatric patients at the designated hospital
- Presentations at local, state and national levels
 - Pharmacist, physician, and nursing education
 - Journal club presentations
 - Patient case seminar at the end of each practice site block
 - Continuing Education Lectures at practice sites and Garden State Pediatric Pharmacy Advocacy Group Meetings
 - Poster presentation at the ASHP Midyear Clinical Meeting
 - Platform presentation at the Pediatric Pharmacy Advocacy Group Meeting or Eastern States Residency Conference
- Completion of two residency research projects
- Completion and submission of a manuscript

The Pediatric Pharmacotherapy Residency, established by the pediatric faculty members at the Ernest Mario School of Pharmacy, is designed to train a pharmacist with advanced knowledge and practice skills in pediatric pharmacotherapy.

This residency is unique because Rutgers has the advantage of a large faculty of practicing pediatric clinical faculty and the opportunity to practice in five different medical centers, each of which has different subspecialties.

The pediatric pharmacotherapy resident will start on July 1st for a 12 month appointment.

Teaching

The resident will earn an appointment with the Ernest Mario School of Pharmacy as a Clinical Instructor through participation as a teaching assistant in the Physical Assessment laboratory. The resident will teach in the Pediatric Pharmacotherapy elective and assist in precepting students on Advanced Practice Experience Rotations.

Benefits

Residents receive a comprehensive benefits package from Rutgers, The State University of New Jersey, including health care.

Staffing

There is no staffing requirement for the residency.
