# 2017 Honors Scholars

# Acknowledgments

The members of the Honors Program Committee and the entire Honors Program community express their appreciation to the Ernest Mario School of Pharmacy for its generous support of the Honors Program and this symposium.

The Honors Program Committee also thanks Deans Barone and Goldin, graduate students, postdoctoral fellows, and faculty research advisors who have made extraordinary efforts to ensure the success of the Pharm.D. Honors Research Program.

# The Ernest Mario School of Pharmacy And The Honors Program

The School of Pharmacy was founded in 1892 as the New Jersey College of Pharmacy by a group of citizens dedicated to the interest of Pharmacy. It was incorporated into the University in 1927. The college was housed at various locations in downtown Newark, and after 1925 in its own building in North Newark.

In 1971, the college was relocated to its present location on the Busch campus in Piscataway, adjacent to the University of Medicine and Dentistry of New Jersey – Robert Wood Johnson Medical School, the Library of Science and Medicine, and other buildings related to the basic sciences at Rutgers University.

The Honors Program of the Ernest Mario School of Pharmacy is a research-oriented program that provides pharmacy students of exceptional merit the opportunity to extend their professional education. The Honors Program challenges student to formulate a research hypothesis and apply appropriate methodologies to solving an important scientific question. This learning experience becomes an integral component of an Honor Student's professional program in pharmacy.

Designed for a small group of well-qualified students, the School of Pharmacy Pharm.D. Honors Research Program offers students the opportunity to pursue special research interests with a high degree of individual attention by faculty advisors. A priority of the Honors Program is to further develop basic skills such as motivation, independence, and creative problem solving.

In over the last twenty years, over 100 students have graduated from the Honors Program.
